➤ Vision & Mission

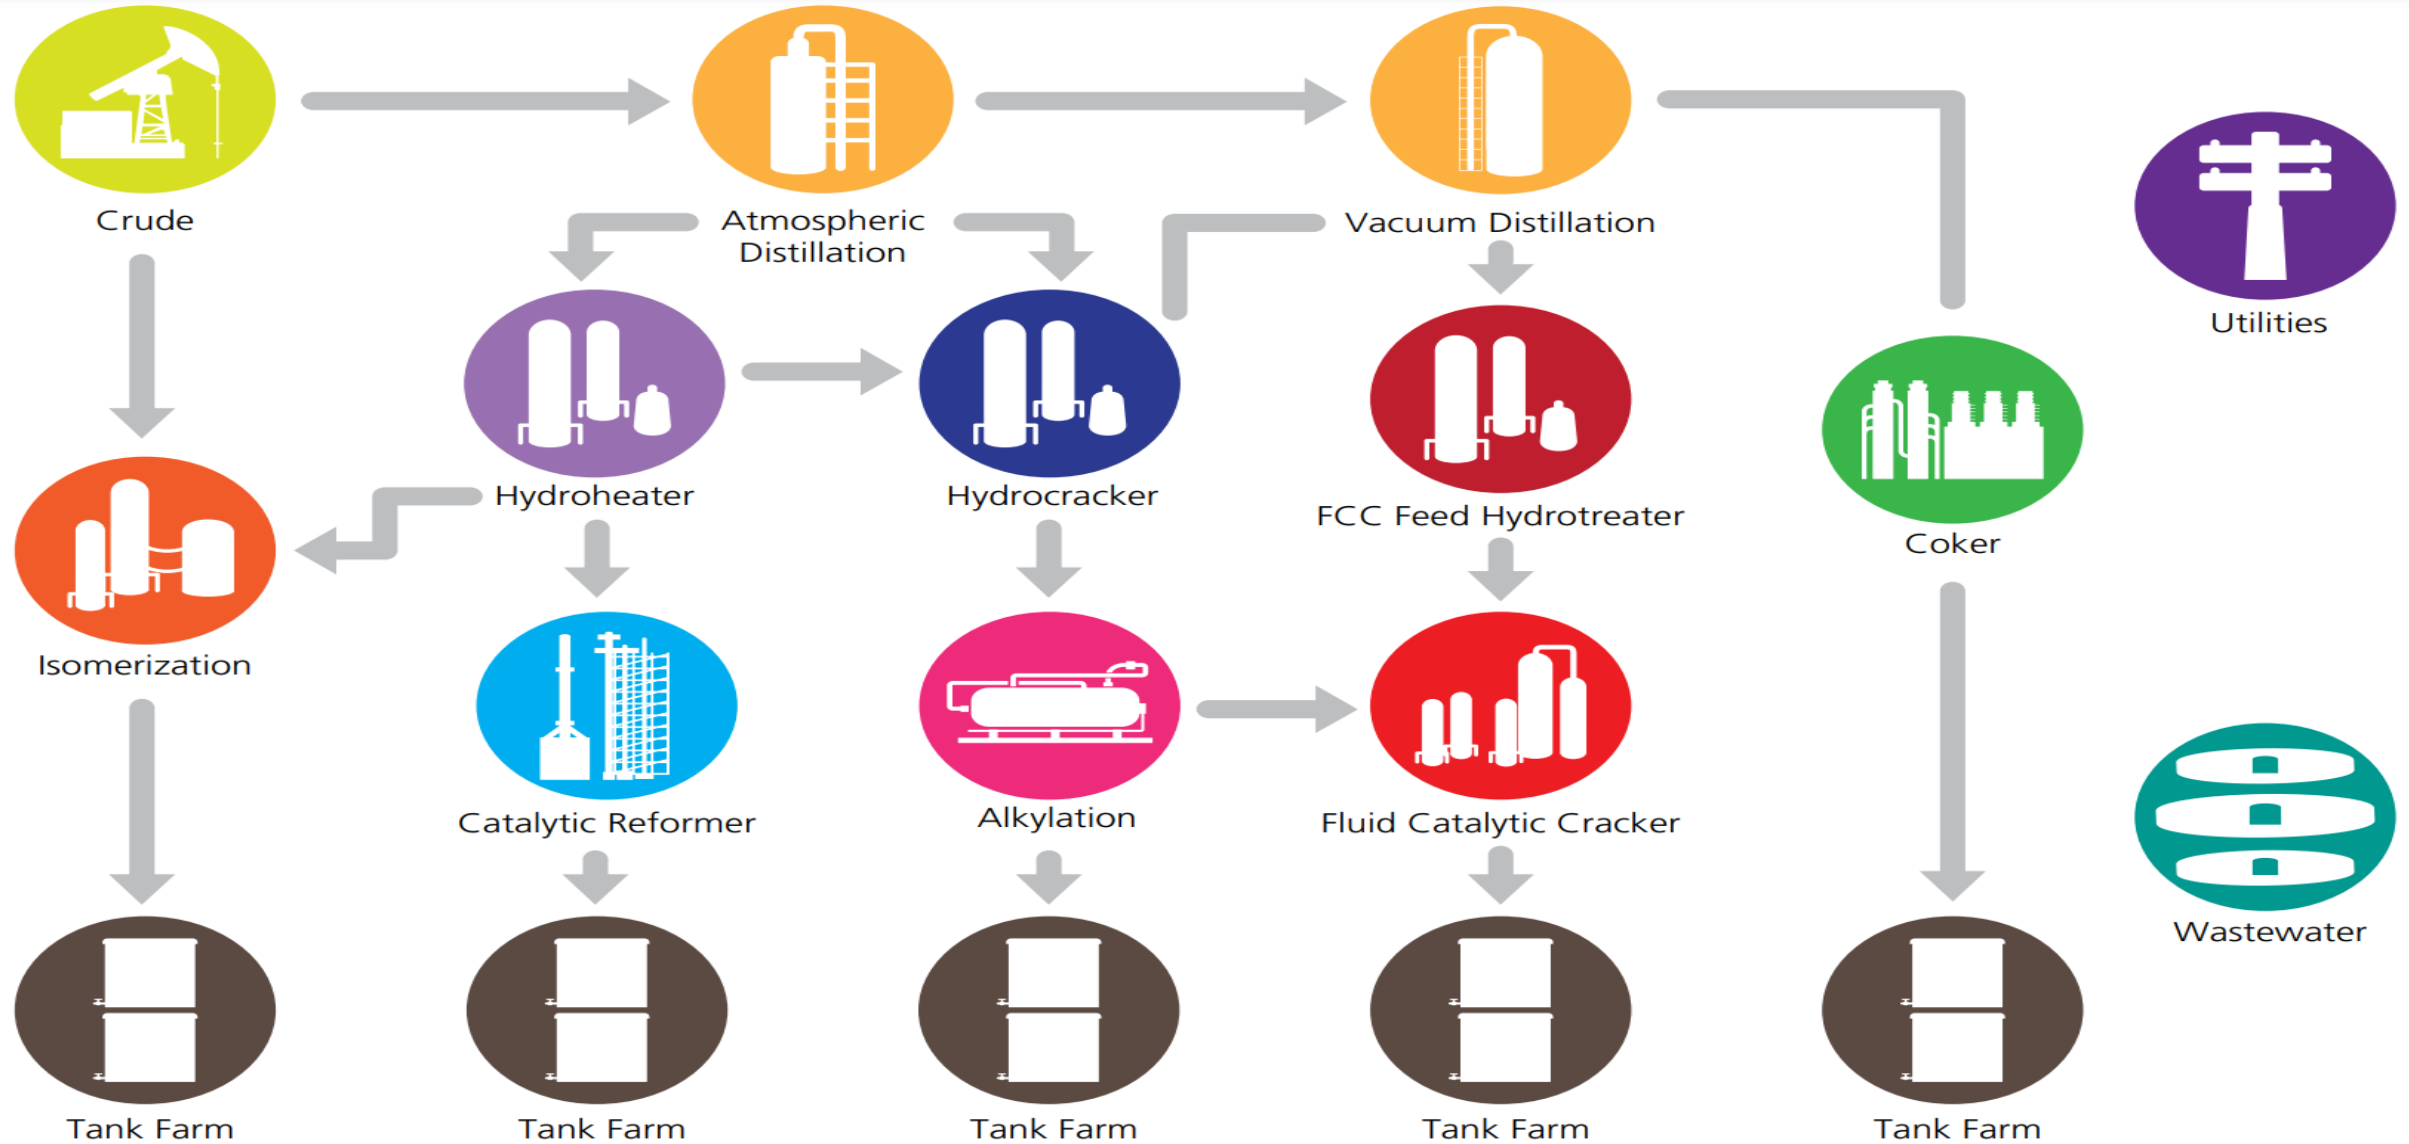

By increasing our production and sales capacity, our aim is to be one of the top suppliers both in exportation and in domestic market. Through this, we are aiming

no concessions in quality, high productivity and new reliable relationships in addition

to our existing ones.

Our mission is to serve our customers high quality and suitable prices. Through this mission, by closely following the technology; valuing our employees, society and customers we are continuously developing and maintain our mutual trusted relationships.

Refinery Overview

COMPANY OVERVIEW

BOLTAS ENERGY has been engineering and constructing refinery for over the years, with focus of continuous innovation. We can offer the total package for your refinery, including Feasibility Study, Front End Engineering Design, Detail Engineering, Procurement, Construction, Start-up Assistance, and Maintenance/Inspection service. Our offer also includes process technologies to meet your environment requirements and to improve refinery profitability.

OUR EXPERTISE

EPCM is a provider of engineering and construction services in the energy industry focusing on onshore and offshore hydrocarbon infrastructure. The services offered, using a combination of Iraq and global knowledge and expertise, cover all project phases from project development and feasibility studies, through engineering design and procurement, to construction, commissioning and operational management.

PRESSURE VESSELS AND TANKS

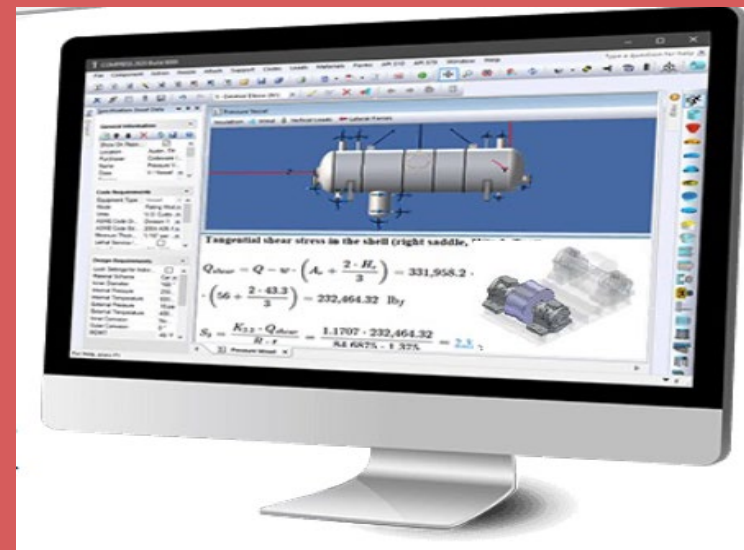

Boltas Energy provides genius solutions worldwide for tank storage facilities. Beginning from the tendering phase up to the test and commissioning of such facilities.

- Oil and Gas
- Petrochemical
- Petroleum,
- Bulk Storage
- Chemical
- Pharmaceutical
- Water
- Wastewater Treatment
- Utility industry sectors ranging from simple storage pressure vessels to complex manifolds.

We Offer You The Highest Level Of Service:

- Competitive Prices
- Custom Built Tanks
- Fuel Management Systems
- Pumps & Accessories
- Prompt & Efficient Service
- Delivery & Collection

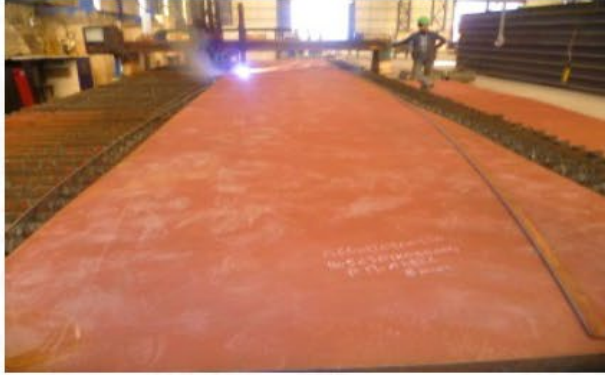

Our Fields of Specialty:

- Storage tanks for crude oil and chemicals
- Finished products
- LPG and LNG
- Biofuels, chemicals, and additives
- Loading and unloading facilities
- Jetties
- Single point moorings
